DETAILED ACTION

Reasons for Allowance

Claims 1 and 10 are allowed. The following is a statement of reasons for the indication of allowable subject matter: prior art (by U.S. Patent 6,412,987 to Horwitz et al.) does not teach: a base plate mountable to a mounting surface of a microscope and an aperture plate, wherein both the microscope and the aperture plate are mounted on a first surface of the base plate; nor does the prior art teach a connector being examined by the microscope extending through an opening of the base plate sized complementarily to receive the connector. It is this examiner's opinion that prior art taken alone or in combination does not render obvious the base plate as described with the rest of the base claim.

Claim 13 is allowed. The following is a statement of reasons for the indication of allowable subject matter: a search in the prior art does not disclose a method of calculating an offset angle and a calibration factor of the fixture based on the offset angle similar to what the applicant has disclosed. It is this examiner's opinion that prior art taken alone or in combination does not render obvious a method of measuring dimensional characteristics of an endface of an optical fiber partially by ways of calculating an offset angle based upon a range between separate measurements in combination with the rest of the base claim.

Claims 2-9, 11, and 14 are allowed by virtue of being dependent upon allowed base claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charlie Peng whose telephone number is (571) 272-2177. The examiner can normally be reached on 9 am - 6 pm M-F.
